Let's Start!

The Concept of Project Management.

Project Management

Learning Outcome:

Describe common activities at work to a using short sentences in familiar spoken and written situations.

Interpret the requirements report to determine the technological needs in managing information, based on rules and protocols established by the company.

Can Do Statements:

- I can explain the concept of project management.
- I can describe important facts to take into consideration related to project management.
- I can read about project management to write a short paragraph with useful information about it.

Ask your partner:

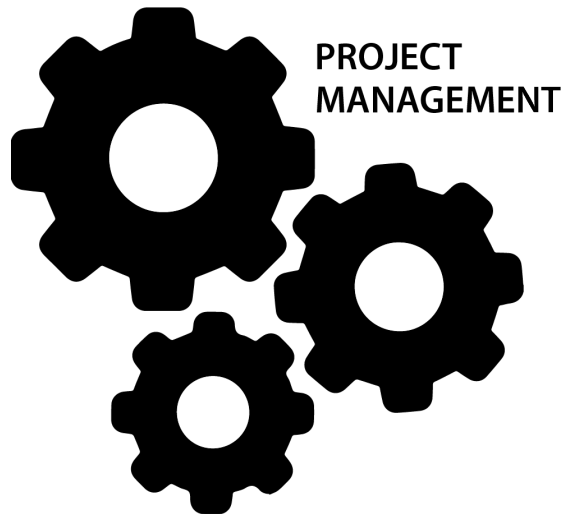

- What do you understand by project management?
- What do you think it is significant about project management?

Let's Explore!

Do you understand the concept of project management?

Instructions: Read the text below.

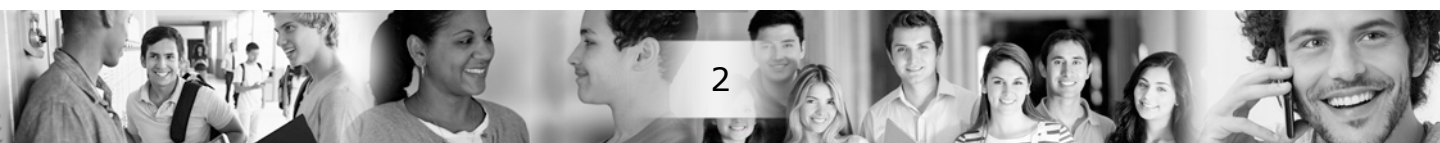

We're working on system requirements at the moment, and now we can set types of requirements apart, as well as to line up a project schedule using a Gantt chart. But, do we understand what project management is? On the next lines, I'm going to explain this concept for you to read it and understand it.

To start, the concept of project management became famous in the mid-20th century as a key element in project development. Project management is a transitory undertaking aimed to create an authentic, unique product, or result. Plus, project management is temporary because projects have a delimited beginning as well as an end. The main purpose of project management is to deliver projects on time, and on-budget.

Another important fact related to project management is that it's unique. As projects aim to achieve a goal, they foster creative processes with the purpose of adapting the project to the stakeholders' requirements. In addition, a project always includes different people from different backgrounds working together to put forward an innovative brand-new product or service.

Project management is a set of operations in which stakeholders and participants apply their knowledge and skills. Consequently, they are going to use the tools they have for the project, solving shortcomings, and applying innovative techniques to satisfy project requirements.

We have already discussed project management. Now, you may ask yourself how you can write a text about this topic. Firstly, you can start with the definition of the concept; then, you can mention its characteristics. Next, you have to write clearly and don't forget that you must check the grammar. Finally, write it in formal English.

Let's Practice!

As a project manager, what do you have to do?

Instructions: Click on the words and move them into the correct category.

1. You have to apply knowledge and skills using the tools they have or the project.
2. You must standardize all projects.
3. You can include people from different backgrounds to work together.
4. You need to deliver projects after the time planned.

Things a manager does	Things a manager doesn't do

Let's Practice!

You must use formal language when you manage a project.

Instructions: Use the words from the word bank to complete each sentence.

1. Project / to create / is / aimed / product. / undertaking / management / a
transitory / an authentic

2. project / and participants / are / use / their / results / in the / skills to / going to /
Stakeholders / get good

3. schedule. / are / a Gantt / up / a /project / We / to line / chart / using

Extension Activity

Now, it's your turn.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Look for more information about project management.
- Write a report with all the things you are going to need as a project manager to create a project.
- Use all the vocabulary and structures practiced in this learning material.
- Share it with a partner.

Self-Assessment

Yes

No

- I search for information about project management.
- I write a report.
- I use all the vocabulary I learned in this learning material.
- I share my report with a partner.

☐	☐

Target Words

- **set apart** (phrasal verb): to differentiate
e.g. Now we can set types of requirements apart.
- **line up** (phrasal verb): to organize
e.g. As well as to line up a project schedule using a Gantt chart.
- **undertaking** (noun): an endeavor
e.g. Project management is a transitory undertaking aimed to create an authentic, unique product.
- **on-budget** (adverb): without overpassing the funds allocated for the project
e.g. The main purpose of project management is to delivery projects on-time, and on-budget.
- **brand-new** (adjective): completely new
e.g. People from different backgrounds working together to put forward an innovative brand-new product or service.

Learning Points

Sentence Review: Simple Present, Present Continuous, Be Going To.

Let's remember those useful structures to talk about the present and the future.

Simple present:

We use the **simple present** to talk about permanent habitual facts in the present.

You can use the following structure:

Subject + verb (action performed) + complement

Examples:

We **work** on project management.

I **develop** systems.

Don't forget to add the "s" in the affirmative when you refer indirectly to a single person or thing.

Examples:

She **designs** the best charts in class.

The Gantt chart **shows** all the tasks of the project.

The negative form in the simple present are made with the verb do not which in the third person becomes **does** not. The main verbs of the sentence keep their base form, we do not add the "s" when we formulate negative statements. Remember that you can use the contraction form of the auxiliary verbs **don't** and **doesn't**.

Look at the following structure in negative form:

Subject + **doesn't / don't** + **verb in base form** + complement

Examples:

We **don't know** how manage that project.

She **doesn't understand** the first task.

To make a question, put the auxiliary **do/does** before the subject. Only information questions can come before the auxiliary verb.

Follow these structures when using question in simple present:

Yes/no questions

Do/Does + subject + main verb + complement?

Learning Points

Wh questions

Wh word + **do/does** + subject + main verb + complement?

Examples:

Does she work with us?

What tools do you use to design Gantt charts?

Remember there are compound questions as "**What tools**", this is a w-h word with a complement.

Present continuous:

We use present continuous to talk about actions that are happening at the moment of speaking, or/and temporary situations.

Look at the following structure in affirmative form:

Subject + verb to be (**am/is/are**) + verb in gerund (**-ing**) + complement

Examples:

I'm working on my tasks at the moment.

This year, we're developing an amazing software system.

To make the negative statement, we just have to add the particle "**not**" next to the verb "**be**". Don't forget to conjugate the verb be.

Look at the following structure in negative form:

Subject + verb to be in negative (**am not/isn't/aren't**) + verb in gerund (**-ing**) + complement

Examples:

We aren't working on the schedule.

He's not doing anything.

To make questions in the present continuous, we put the verb "**be**" (conjugated) before the subject. Just as in the simple present, only a **w-h** word can come before the verb "**be**".

Follow these structures for questions in present continuous:

Yes/no questions:

Verb to be (**Am/Is/Are**) + subject + verb in gerund (**-ing**) + complement + ?

Learning Points

Wh questions:

Wh word (What/Where/When...) + verb to be (**am/is/are**) + subject + verb in gerund (**-ing**) + complement + ?

Examples:

Are we working on the project now?

What colors are we using to differentiate the tasks?

We can also use the present continuous to express near future plans. Remember this is only for near future, for long term plans we use the going to.

Examples:

We're finishing the first task **tomorrow**.

We're not working next **Monday**.

Future with going to:

We use the "be going to" structure to talk about plans for the future.

Take a look to the following structure:

Subject + verb to be (**am/is/are**) + **going to** + main verb + complement

Examples:

I'm going to design the plan in a Gantt chart next week.

We **are going to visit** the client to collect requirements next month.

To make the negative form, we add **not** to the verb **be** conjugated.

Take a look to the following structure in negative form: OR

Subject + verb to be (**am not/isn't/aren't**) + **going to** + main verb + complement

Examples:

She **is not going to manage** that project.

We **are not going to continue** with that task.

For questions, we put the verb **be** before the subject, just as we do in the present continuous.

Follow these structures for questions with **be going to**:

Yes/no questions:

Verb to be (**Am/Is/Are**) + subject + **going to** + main verb + complement + ?

Learning Points

Wh questions:

Wh word (What/Where/When...) + verb to be (**am/is/are**) + subject + **going to** + main verb + complement + ?

Examples:

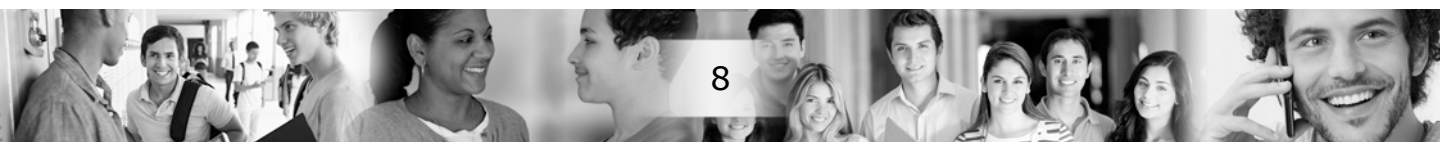

Are we **going to continue** with that task?

Why **are you going to quit** the project?

Simple present	Present continuous	Be going to
<i>I work on project management.</i>	<i>I'm working on a big project at the moment.</i>	<i>I'm going to continue with that project on January.</i>
<i>He doesn't know how to use Google calendar.</i>	<i>He's not working today.</i>	<i>He's not going to continue next year.</i>
<i>Do you like your</i>	<i>Are you working</i>	<i>Are you going to manage that project?</i>

Examples

- *We're working on system requirements at the moment.*
- *Do we understand what project management is?*
- *I'm going to explain this concept for you to read it and understand it.*
- *Now you are going to write a short paragraph with useful information about it.*
- *Don't forget that you must check the grammar.*

Learning Points

Formal vs. Informal Writing.

There are two kinds of speech in English, formal and informal speech, you choose which to use depending on the person and the situation.

There are some pivotal differences between formal and informal speech.

Formal speech:

We usually use formal English in books, articles, essays, and formal letters. In formal English, longer and more structuralize expressions are used, we express our demands, wishes, opinions, and so forth indirectly and keenly.

In formal English, never use contractions of verbs, or omit syllables using the apostrophe. We have to write complete words and statements.

What is more, common expressions as "get" are not common in formal English, those words that come from Latin are considered more formal than the English words.

Informal speech:

Informal English is far more common than formal English, because it is the language you use to talk to your family, and acquaintance, informal English is more familiar.

Sentences in informal English are shorter, we can use contractions, omit syllables in some words, and we talk straight forward. The most common English words and expressions are used in informal English.

On the chart below, you can see some examples of formal and informal expression.

Formal	Informal
<i>Dear Sir/ Madam (surname)</i>	<i>Hi (first name)</i>
<i>I'm writing to draw your attention to...</i>	<i>I'm writing to let you know...</i>
Please accept my sincere apologize.	<i>I'm sorry about...</i>
I write to express my dissatisfaction with...	<i>I'm fed up with...</i>
<i>I look forward to hearing from you soon.</i>	<i>Give my love to...</i>

Example

- Don't forget that you must check the grammar, and write it in formal English, as this is an assignment for the class.
